INDICATED CROP PRODUCTION BY CROP REPORTING DISTRICTS, 1942

To supply information which can be utilized in facilitating the orderly movement of the 1942 crop of wheat and other small grains, the Crop Reporting Board has compiled the following estimates of 1942 wheat production by districts in 18 of the most important wheat-producing States, and estimates of oats, barley, rye, and flaxseed production by districts in certain of the northern States. For each State, the district estimates total to the official State figures published in the General Crop Report on August 10, 1942. For the purpose of comparison, estimates of production by districts are shown for 1940 and 1941.
